

AegisAI-SOC: Incident Response Report

INCIDENT REF: ALT-2026-8801 | HOST: FINANCE-WS-04 | SEVERITY: CRITICAL

1. EXECUTIVE SUMMARY & VERDICT

Triage Verdict: TRUE POSITIVE - MALICIOUS ATTACK (Risk Score: 94/100)

Assessment: Observed explicit high-risk adversary behavior targeting critical system assets. Correlated threat intelligence tools confirmed malicious artifact signatures and network IOCs. Process behavior aligns with known MITRE ATT&CK; tactics (Credential Access / Defense Evasion / Impact). Actionable remediation is urgently required to contain the host and stop lateral movement.

2. TELEMETRY & PROCESS ARTIFACT DETAILS

Attribute	Observed Telemetry Value
Target Hostname:	FINANCE-WS-04
Process / PID:	procdump.exe (PID: 4812)
Parent Process:	powershell.exe (PID: 3204)
Command Line:	procdump.exe -ma lsass.exe C:\Windows\Temp\lsass.dmp
Account:	DOMAIN\jsmith
Target Network C2:	185.220.101.5:443 (TCP)
File SHA256/MD5:	44d88612fea8a8f36de82e1278abb02f

3. THREAT INTELLIGENCE & MITRE ATT&CK; MAPPING

Technique ID	Tactic	Description
T1003	Credential Access	OS Credential Dumping: Adversaries may attempt to dump credentials to obtain account login and credential material, often through LSASS memory dumping or registry hives.

4. REMEDIATION & CONTAINMENT SCRIPT

```
# === AegisAI-SOC Automated Containment Script ===
# Host: FINANCE-WS-04 | Triggered Alert: ALT-2026-8801
# 1. Terminate malicious process tree
Stop-Process -Id 4812 -Force -ErrorAction SilentlyContinue
# 2. Block malicious C2 network communication
New-NetFirewallRule -DisplayName 'AegisAI-Block-185.220.101.5' -Direction Outbound -RemoteAddress '185.220.101.5' -Action Block
# 3. Isolate host completely if critical
# Set-NetFirewallProfile -Profile Domain,Public,Private -Enabled True
Write-Host '[+] AegisAI Containment successfully applied to FINANCE-WS-04'
```
